INC-2026-06-14: Serves precomputed risk features to fraud-scorer with a 5ms degradation

Northwind Payments · SEV2 · service feature-store · author n.haddad

Started 2026-06-14T13:00:00Z · detected 2026-06-14T13:11:00Z · resolved 2026-06-14T13:00:00Z

Customer impact

Fraud scores were systematically understated for 48 minutes. 1,100 transactions were rescored retrospectively.

Root cause

Redis memory pressure triggered eviction of risk features, and fraud-scorer treated missing features as zero rather than unknown.

Affected services

feature-store, fraud-scorer. Downstream services were affected through their dependency on feature-store.

Timeline (UTC)

13:00 — First symptoms observed on feature-store.

13:11 — Alert pages the on-call engineer for feature-store.

13:19 — Cause identified and mitigation begins.

13:00 — Service returns to baseline; incident resolved.

Action items

• Add an integration test covering the failure mode.

• Require a load test for configuration changes of this class.

• Document the mitigation steps in the service runbook.
